

HEALTH PLANNING COURSES

Conducted at Dubai Healthcare City.

Health Planning Courses.

Industry experts TAHPI offer a suite of healthcare planning courses to provide you with the knowledge, skills and practical experience to take on specialized professional planning roles in the region's growing healthcare sector. These programs are the first of their kind to be delivered in the Gulf and provide a unique opportunity for healthcare personnel based in the region.

Courses Offered.

TAHPI is currently offering two certificate courses:

- Health Service Planning
- Health Facility Planning

On successful completion of a program, you will receive a certificate of continued professional development (CPD) in your chosen discipline. The courses will be delivered in Dubai Healthcare City (DHCC), offering students the opportunity to study in a thriving best-in-class, globally renowned center for healthcare expertise.

Course 1

Health Facility Planning

Course 2

Health Service Planning

The courses are offered in both classroom setting and online:

Classroom Learning:

An intensive time limited program to encourage busy professionals and practitioners to attend and learn. The programs consist of a number of lectures over a 1 or 2 week periods. The lectures will be delivered in a classroom according to a business-friendly schedule, out of work hours and weekends. This is to allow students study time and minimize absence from employment.

Online Learning:

There are two online options for students:

- Webinar type attendance, the students will be joining a scheduled classroom from their location, this allows students to have the interactive and the onsite feel of the course without having to travel to Dubai to attend.
- Online lectures will be available on TAHPI website to register directly and download lectures at any time. Students will complete the course at their own pace. Communication with lecturer will be via emails.
